

**Department of Toxic Substances Control  
Project Status Update  
for  
Wyle Laboratories Norco Facility Site  
February 6, 2006**

**SITE INVESTIGATION/CLEANUP**

- Wyle is preparing to modify the existing heating, ventilation and air conditioning (HVAC) system in the Norco High School Science Building. The adjustments are intended to reduce the levels of vinyl chloride and other chemicals found in the indoor air. We required Wyle to take this action and we are overseeing the work.
- Continued operation and maintenance of the vapor extraction system, located on the Wyle property near Golden West Lane. The system pulls chemical vapors from the soil through a series of underground pipes and passes them through a carbon filter to remove the contaminants. The system will help prevent chemical vapors from seeping into the homes at the southern end of Golden West Lane. The vacuum readings in monitoring probes offsite were also recorded, to determine how much air vapor the vacuum unit is pulling back onto the site.

Ongoing Remedial Investigation activities:

**Last week**

Onsite:

- Continued First Quarter 2006 groundwater sampling.

Offsite:

- Continued collecting vacuum measurements in monitoring and extraction wells associated with the extraction system, located on the Wyle property near Golden West Lane.
- Continued sampling permanent soil vapor probes VW-1 through VW-6 and VW-14 through VW-16 as part of quarterly sampling. These probes are located along Golden West Lane.

**Sampling planned for this week**

Onsite:

- No sampling planned for this week.

Offsite:

- Continue collecting vacuum measurements in monitoring and extraction wells associated with the extraction system, located on the Wyle property near Golden West Lane. These measurements are taken to determine how much air vapor the vacuum unit is pulling back onto the site, and will help us determine how well the system is working.

- Measure water levels in off-site groundwater monitoring wells.
- Drill and install temporary soil gas sampling probes ESG-108 (2288 Buckboard Lane), ESG-110 (970 Third Street), and ESG-112 (918 Third Street) as part of step out sampling in northwest area.

### **PUBLIC PARTICIPATION**

- No change from last week's update.
